

# Artwork Requirements

Please follow these guidelines to insure good quality reproduction of your artwork.

- Artwork for engraving custom logos should be sent in PC format. (No Macintosh files please.)
- The preferred formats are: .JPG, but we will accept .TIF .GIF .BMP.
- Please do not send .PDF files.
- We can also accept Corel Draw (.cdr) files up to version 9.
- We can accept artwork on CD, or email.
- We also accept hard copy black & white artwork that can be scanned.
- Artwork should be black and white line art, no half tones.
- Please avoid very tiny artwork that must be enlarged. (the larger the image, the better it will look)
- All artwork should be 300 DPI or greater.
- We do not accept faxed artwork.
- Color logos are accepted only for those cases that can be successfully converted to black and white.
- We will notify you by email if artwork needs to be cleaned.
- If poor quality artwork is provided and needs to be cleaned up there will be an additional art charge.
- Two proofs of the artwork are included in the labor price. After the first two proofs, there will be an extra charge for each additional proof needed to complete your order.
- Please allow additional time if you do not provide good quality artwork!

If you have any questions regarding artwork requirements please contact us at [carole@crystaltouch.com](mailto:carole@crystaltouch.com) or by phone: (561) 684-3447.

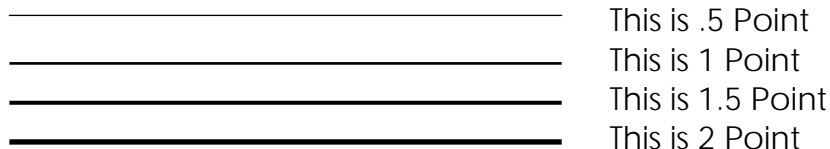

Acceptable Artwork

This is unacceptable grayscale

## Lines

All lines should be at least 1.5 Point thick. Small lines tend to disappear.
